MODULE 01

WHAT IS THE MOVIE RECAP NICHE?

The niche in one sentence

A movie recap channel tells the story of a full movie in 10 to 30 minutes, so busy viewers get the whole idea without spending 2+ hours watching it.

People are busy

They see a trailer and want the story, but they don't have time to sit through the full movie.

Recaps fill the gap

A recap gives them the plot, the twists and the ending in a fraction of the time.

Faceless

You never show your face. Movie clips, a voiceover and good editing carry the whole video.

Watch the movie → Summarise → Script → Voiceover → Edit → Upload

MODULE 02

IS IT PROFITABLE?

Short answer: YES. Very, very profitable.

- **Endless demand.** People always want to watch movies, and new ones come out every week.
- **Endless content.** Every movie ever made is a possible video. You'll never run out of ideas.
- **Long watch time.** Recaps run 10 to 30 minutes, so you get more ad breaks and more money per view.
- **Global audience.** Recaps work in English, Hindi, Swahili, Spanish and more. You can even run more than one channel.
- **Faceless and repeatable.** Once you have your system, every video follows the same steps.

MODULE 02

IS IT PROFITABLE?

The money math: what ONE video can earn

VIEWS ÷ 1,000 × **RPM** = **YOUR PAY**

RPM = what you earn per 1,000 views. For long movie recaps, roughly **$1 to $5** depending on your audience's country.

50K views	500K views	2M views
$50 TO $250	**$500 TO $2,500**	**$2,000 TO $10,000**
A small but solid video	One good video that takes off	A viral recap. It happens in this niche.

💡 Do this live in class: open any recap channel on Social Blade or vidIQ and work out the earnings together.

WHERE TO FIND MOVIE IDEAS

Never run out of movies to recap

WHERE TO LOOK

MovieBox
Trending and new releases

Netflix
"Top 10 today" list

Showbox
Big library to browse

Downloader app
Android, for app links

YouTube
What other recap channels upload

Trailers
Upcoming and hyped movies

WHAT MAKES A GOOD PICK

- A **strong story** with a twist, mystery or shocking ending
- **Trending or newly released**, so people are already searching for it
- Genres that do well: **thriller, horror, sci-fi, survival, K-drama, crime**
- Already **doing well on other recap channels**, which proves people want it

🎯 Keep a running list of 20+ movie ideas so you're never stuck.

MODULE 05

WHERE TO DOWNLOAD MOVIES

Get the movie onto your device

MOVIEBOX

The main app we use. Search the movie, download it in good quality, and it's saved on your device ready to edit.

1. Install MovieBox
2. Search for your movie
3. Choose the **highest quality** (720p or 1080p)
4. Download, then move it to your editing folder

OTHER OPTIONS

Downloader app (Android)
Paste a link to install apps or download files

Showbox
Another big movie library

Bought or rented digital copies
The safest option for clean, high-quality files

📁 Make one folder for each video: **movie, script, voiceover, images, thumbnail.**

MODULE 06

WRITING YOUR SCRIPT

Explain the movie. Don't retell every scene.

THE GOLDEN RULES

- **Watch the movie fully** and understand it before you write a word
- Your goal is to make viewers **understand** the movie, not to describe every detail
- Keep **only the most important parts**: the setup, the main conflict, the twists, the ending
- **Hook in the first 10 seconds.** Start with the most shocking moment or question.
- Write the way people talk, in simple and dramatic language

✔ DO

"A man wakes up in a locked room with no memory and a note that says *don't trust her*..."

✘ DON'T

"So first he wakes up, then he looks around, then he walks to the door, then he..."
