How to use this book

This book works in **two steps**. Every blue word is a link: tap it to jump. The dark bar at the top of every page has **Chapter overview** and **Cast** buttons, and your PDF app's **bookmarks panel** lists every chapter and character.

STEP 1 · Build your cast. Generate one reference image for each character using the character prompts. Save the images and tick **Reference made**. Attach these references when generating beats so faces stay consistent.

STEP 2 · Generate the beats. Work chapter by chapter from the chapter overview. Each beat is one image on screen, about **5 seconds** of narration. Timecodes match the Michael voiceover in the voiceover folder. Copy the image prompt, generate, and tick **Image**, **Animated** and **Placed** as you go. Use the notes box at the start of each chapter for anything you want to remember.

In the edit: drop each image at its timecode, or import the beats SRT file into CapCut or Premiere: each subtitle block is one beat, so you can line images up with it and get captions for free. Add a slow push-in or pan to every image.
